AUROUAV ROS 2 Deployment Milestone

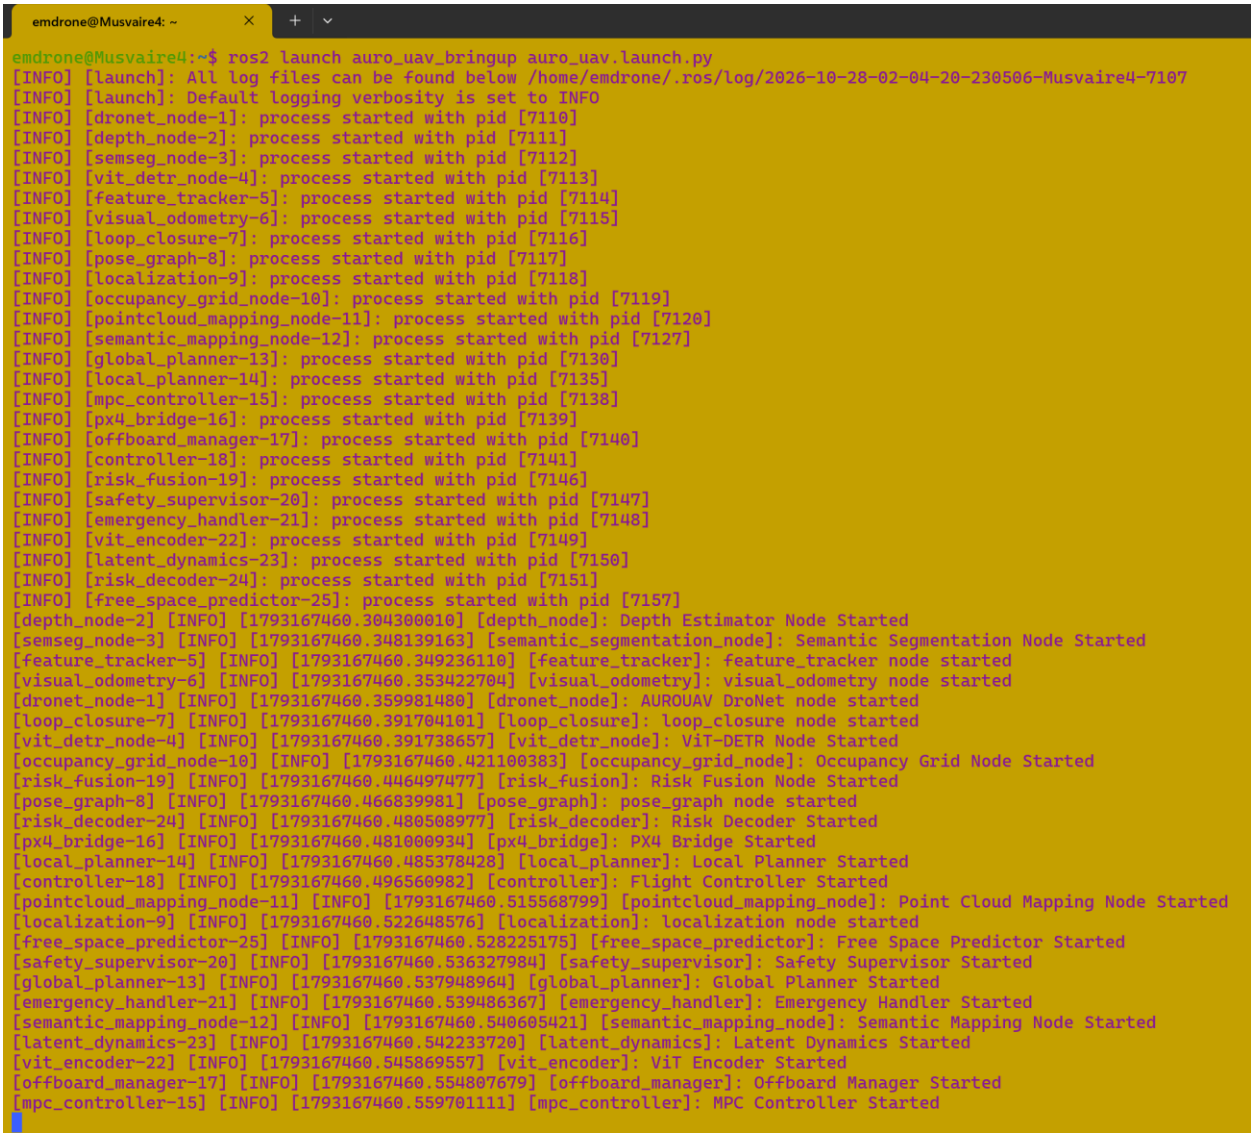

Fig. 1. *Integrated launch of the AUROUAV autonomy stack, validating interoperability among perception, estimation, mapping, planning, control, safety, and world-model subsystems within ROS 2 Jazzy.*

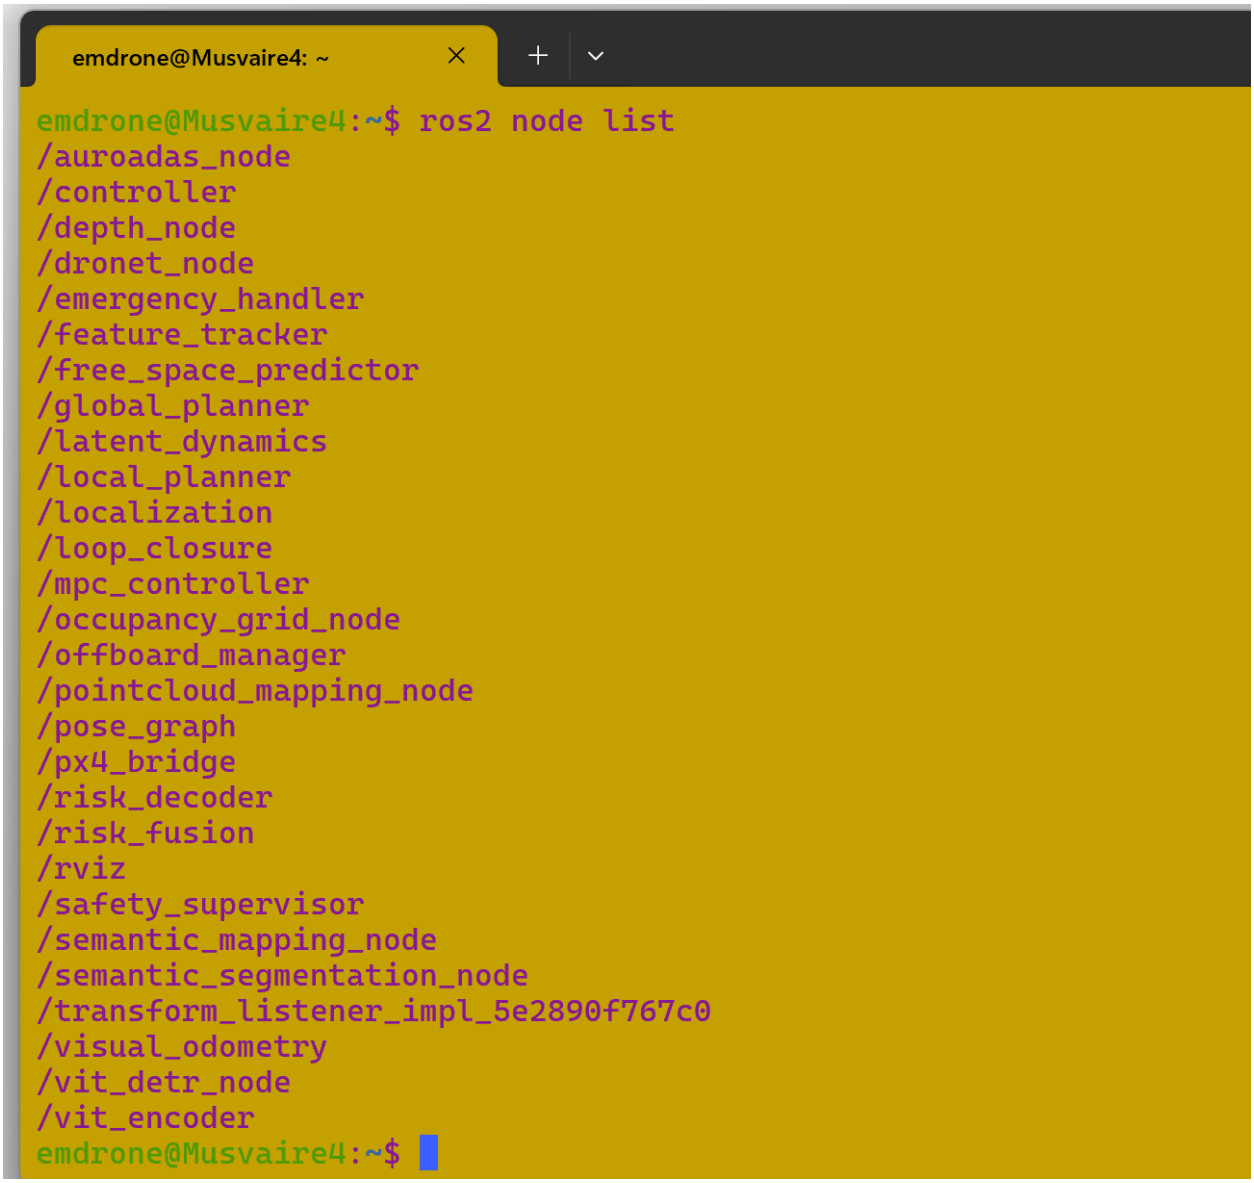

Fig. 2. *System-level verification of AUROUAV through concurrent execution of twenty-one ROS 2 nodes, demonstrating modular autonomy orchestration and scalable software architecture for autonomous UAV operations in GNSS-denied environments.*
